
Ano Letivo 2018-19

Unidade Curricular REPRODUÇÃO EM AQUACULTURA

Cursos AQUACULTURA E PESCAS (2.º Ciclo)
RAMO: AQUACULTURA

Unidade Orgânica Faculdade de Ciências e Tecnologia

Código da Unidade Curricular 14301047

Área Científica CIÊNCIAS BIOLÓGICAS

Sigla CB

Línguas de Aprendizagem Português ou Inglês (se estiverem presentes estudantes internacionais)

Modalidade de ensino Presencial

Docente Responsável Adelino Vicente Mendonça Canário

DOCENTE	TIPO DE AULA	TURMAS	TOTAL HORAS DE CONTACTO (*)
Adelino Vicente Mendonça Canário	PL; T; TP	T1; TP1; PL1	7.5T; 5TP; 10PL

* Para turmas lecionadas conjuntamente, apenas é contabilizada a carga horária de uma delas.

ANO	PERÍODO DE FUNCIONAMENTO*	HORAS DE CONTACTO	HORAS TOTAIS DE TRABALHO	ECTS
1º	S2	7.5T; 5TP; 10PL	84	3

* A-Anual; S-Semestral; Q-Quadrimestral; T-Trimestral

Precedências

Sem precedências

Conhecimentos Prévios recomendados

Biologia Geral

Objetivos de aprendizagem (conhecimentos, aptidões e competências)

1) Provide basic concepts of reproductive biology 2) Provide the scientific and reasoning for the application of reproductive biology to aquaculture 3) Provide the tools for the students to explore recent advances in reproductive biology and related subjects both for basic science and applications of science.

Conteúdos programáticos

- 1) Introduction: Variability of reproductive strategies in teleost fishes
- 2) Origin and morphology of gonads and ducts
- 3) Sex determination and differentiation in fish
- 4) Gametogenesis
- 5) Neuroendocrine control of gametogenesis
- 6) The cycle of gametogenesis and endocrine cycle in salmonids and non-salmonids
- 7) Hormonal pheromones
- 8) The endocrine regulation of puberty in male fish: implications for ongoing problems in aquaculture
- 9) Hormonal spawning induction in fish farming
- 10) Environmental control of fish reproduction

Metodologias de ensino (avaliação incluída)

Topics will be presented in lectures which the students explore further in bibliography provided from books and scientific papers, generally reviews. A few practical hands on or demonstration classes will deal with basic topics such as gametogenesis. Students are encouraged to further explore particular topics by writing a review in the style of a scientific paper, which will be subject to peer review and will be presented orally. Students will be examined by 1) Extended abstract of article and oral presentation(25%) 2) 4) written exam(75%).

Academic Year 2018-19

Course unit REPRODUCTION IN AQUACULTURE

Courses AQUACULTURE AND FISHERIES
RAMO: AQUACULTURA

Faculty / School Faculdade de Ciências e Tecnologia

Main Scientific Area CY BI

Acronym BC GB

Language of instruction Portuguese or English (if international students are present)

Teaching/Learning modality direct contact with students

Coordinating teacher Adelino Vicente Mendonça Canário

Teaching staff	Type	Classes	Hours (*)
Adelino Vicente Mendonça Canário	PL; T; TP	T1; TP1; PL1	7.5T; 5TP; 10PL

* For classes taught jointly, it is only accounted the workload of one.

Contact hours

T	TP	PL	TC	S	E	OT	O	Total
7.5	5	10	0	0	0	0	0	84

T - Theoretical; TP - Theoretical and practical ; PL - Practical and laboratorial; TC - Field Work; S - Seminar; E - Training; OT - Tutorial; O - Other

Pre-requisites

no pre-requisites

Prior knowledge and skills

General Biology

The students intended learning outcomes (knowledge, skills and competences)

1) Provide basic concepts of reproductive biology 2) Provide the scientific and reasoning for the application of reproductive biology to aquaculture 3) Provide the tools for the students to explore recent advances in reproductive biology and related subjects both for basic science and applications of science.

Syllabus

- 1) Introduction: Variability of reproductive strategies in teleost fishes
- 2) Origin and morphology of gonads and ducts
- 3) Sex determination and differentiation in fish
- 4) Gametogenesis
- 5) Neuroendocrine control of gametogenesis
- 6) The cycle of gametogenesis and endocrine cycle in salmonids and non-salmonids
- 7) Hormonal pheromones
- 8) The endocrine regulation of puberty in male fish: implications for ongoing problems in aquaculture
- 9) Hormonal spawning induction in fish farming
- 10) Environmental control of fish reproduction

Teaching methodologies (including evaluation)

Topics will be presented in lectures which the students explore further in bibliography provided from books and scientific papers, generally reviews. A few practical hands on or demonstration classes will deal with basic topics such as gametogenesis. Students are encouraged to further explore particular topics by writing a review in the style of a scientific paper, which will be subject to peer review and will be presented orally. Students will be examined by 1) Extended abstract of article and oral presentation(25%) 2) 4) written exam(75%).
