#### Precedências

Sem precedências

#### Conhecimentos Prévios recomendados

Investimentos, Matemática, Estatística

#### Objetivos de aprendizagem (conhecimentos, aptidões e competências)

#### Conteúdos programáticos

1. Tipologia dos riscos  
 1.1. Fontes e medidas de risco  
 1.2. Risco de preço  
 1.3. Risco de taxa de juro  
 1.4. Risco de taxa de câmbio

2. Instrumentos de gestão de risco  
 2.1. Swaps sobre taxas de juro  
 2.2. Swaps cambiais  
 2.3. Contratos de futuros  
 2.4. Credit default swaps

3. Gestão de risco e crises

---

#### **Metodologias de ensino (avaliação incluída)**

As sessões de contacto serão orientadas para a intervenção dos alunos na discussão com o docente do tema em análise, suas implicações na gestão de risco e no mundo ?global? em que se enquadram as organizações contemporâneas. Este princípio não impede que algumas sessões o docente venha a utilizar uma metodologia de abordagem teórica da matéria para enquadrar determinado tema. Estas sessões de enquadramento não devem ultrapassar 25% do total das horas de contacto.

O método de avaliação deverá basear-se na análise do percurso do aluno ao longo das sessões de contacto, tendo em atenção a sua capacidade em apreender os conceitos da gestão de risco e ser capaz de os aplicar correctamente a casos práticos. A avaliação será alicerçada numa prova escrita individual a realizar após o termo das sessões de contacto.

no pre-requisites

---

**Prior knowledge and skills**

Investments, Math and Stats

---

**The students intended learning outcomes (knowledge, skills and competences)**

- . Understand financial market risks;
  - . Identify sources of risk and how to measure it;
  - . Identify price risk, interest rate risk, exchange risk and default risk;
  - . Identify futures contracts, and discuss their characteristics and specificities according to the characteristics of the underlying assets;
  - . Understand interest rate swaps and exchange swaps;
  - . Swap pricing;
  - . Identify credit default swaps;
  - . Compare hedging and speculation strategies.
- 

**Syllabus**

## 1. Risks

## 1.1. Sources and risk measures

## 1.2. Price risk

## 1.3. Interest-rate risk

## 1.4. Exchange risk

## 2. Risk management

## 2.1. Interest-rate swap

## 2.2. Currency swaps

## 2.3. Futures contracts

## 2.4. Credit default swaps

## 3. Risk management and crisis

#### **Teaching methodologies (including evaluation)**

Lessons promote students' participation and discussion of each subject with the Faculty. We carefully consider what is risk management in a global world, where companies operate. This does not mean that certain sessions are not of a more academic nature. Such sessions do not represent more than 25 percent of the total sessions.

Students' appraisal method should be based on their progress along the lessons, bearing in mind their learning potential in terms of risk management theory and techniques and their ability to apply them in applied situations. Assessment is through an individual written exam.
